

DEANOCCIOLA (Deangelis Srl) is among the three hundred Italian Companies awarded "Champions of the Growth": they are the motor of the economic recovery of Italy.

Fatturato meno di 5 milioni

RAGIONE SOCIALE	CITTÀ	SETTORE ECONOMICO	FATTURATO 2016	CRESCITA MEDIA 2013-2016	SIGILLO
Deangelis	Gallese (VT)	Agricoltura	3.999.942	+44%	

- Rank of Deangelis Srl / Deanocciola among the companies with annual turnover < 5 mln Euros
 - (+44% growth in the 3-year-period 2013-2016)

Some companies grow faster than others thanks to their ideas and innovative model of business. In order to identify the most resourceful companies for the Italian Economy, the *German Institute for Quality and Finance* together with the Italian newspaper *La Repubblica – Affari&Finanza* are presenting - for the first time in Italy - the report "Champions of the Growth 2018". The dossier is a detailed survey whose aim is to award the best 300 Italian Companies which achieved a significant increase of revenues in the 3-year-period 2013-2016, and we are very proud to announce that **DEANOCCIOLA, a family-owned Organic Certified Agri-Food Company located in the South/Center of Italy, has been mentioned among the best Italian Companies.**

The *GIQF* drew up the ranking list of the top 300 "Champions of the Growth" among a long list of more than 10.000 companies with the following requirement: minimum turnover of Euro 180.000 in the year 2013 / Euro 2 million in 2016; factory based in Italy and grown up organically and not by the acquisition of other companies. Divided into three "excellence levels" (each level has its seal), the 300 "Champions of the Growth" have been awarded with the following Quality Seals:

- Diamond Seal: companies with annual average turnover of more than 50%
- Platinum Seal: companies with annual average turnover of more than 30%.
- Golden Seal: companies with annual average turnover of more than 10%.

The aim of the award is to celebrate the dinamism and the proactivity of the Italian companies that contribute to be the new drivers of the economy and the society. The attribution of the Quality Seal contributes to increase the interest of potential business partners, customers, stakeholder and also to acquire new leads and business occasions. Furthermore, the Quality Seal is a showcase for the awarded companies, and can be used for commercial purposes.

According to Mr Bieker, the director of the survey, being a company with a strong growth means also that the company can make the "quantum leap" from the status of small-sized business to the status of successful business and finally aim to become leader in its target market: «*The growth of each company turns into a contagious factor with regards to the performances of the whole production system, and this is crucial for the competitive advantage of the entire Country*».

The "Champions of the Growth 2018" survey provides an overview of the Italy which is often under-reported or, at least, poorly highlighted. It is an overview of the Italy that risks, invests, creates employment and spreads welfare on the territory. Most of the times these efforts do not meet the deserved reputation among the public, but this do not means that this Italy is not able to generate economies of absolute importance.

In a globalized market it is possible to create successful realities even when the headquarter of the company is not based in the Northern Italy. The most important thing is having ideas that can make the difference and being able to create an international network with the purpose of expand their potential market. Another feature, of course, is the capability to anticipate the actions of the competitors and intercept the evolution of the market in advance.
