

Company Description – VeggieMeat GmbH – vegini

Founded in 2015, based in Lower Austria with over 90 employees, we are experts in producing 100 % plant-based meat alternatives based on pea, rice and chickpea protein. Unbelievably meat-like, with a fibrous texture and a juicy bite, our products are the perfect solution for anyone: vegans, vegetarians, flexitarians, and also meat-lovers!

We focus on superior quality and taste while providing healthy plant-based meat alternatives to our customers in all categories. Since the beginning we have been working with private label customers around the world, using our extensive plant-based experience to bring them bespoke solutions.

vegini is not only a healthy alternative to meat. vegini is so much more: it is vegan, lactose-free, soy-free, gluten-free, 100% plant based, and GMO-free - 100% taste and 100% culinary delight!

Products

vegini Ground Beef-Style

When it comes to taste, structure and appearance, our vegini Ground Beef-Style is incredibly meat-like and one of the most natural products on the market, with no artificial flavouring or preservatives.

It can be used in multiple recipes, just like real ground beef! Due to its unique structure, it can also be used for forming products like burger patties or meat-less balls.

vegini Schnitzerl and Nuggets

With our Schnitzerl and Nuggets we have reinterpreted classic meat products in a modern and sustainable way.

Fried or baked, these crispy delicacies with their juicy and meat-like texture are ready to out-perform the competition.

vegini Bratwurst

Our new bestseller on the market is the vegini Bratwurst – juicy, tasty and unbelievably meat-like!

The skin of the Bratwurst helps the sausage retain juiciness while cooking and our delicious spice mix ensures this tender and tasty sausage will be the BBQ favourite of the year.

Fish alternatives

We torpedo the mass fishing industry and offer a sustainable alternative, so that our overfished oceans can recover.

Made from rice protein with a crispy gluten-free breading they are incredibly similar to "real" fish products in terms of taste, appearance and structure. Our newcomers are the "vegini crispy tiger prawns" and the "vegini crispy fish filet".
